PROFILE

Highly motivated and skilled backend developer with experience in Laravel. Proficient in PHP, HTML, andCSS. Strong knowledge of backend development, with expertise in creating admin panels. Demonstrated ability to successfully complete e-commerce ,API projectsand CRM projects .

PROFESSIONAL EXPERIENCE

Full Stack Web Developer (PHP-Laravel)

Moosavic

I developed APIs for the iOS and Android platforms using PHP, Laravel, and MySQL. I also created dashboards for managing the system using open-source HTML templates. I utilized my skills in PHP, Laravel, and MySQL to create a seamless backend system.

Full Stack Web Developer (PHP-LARAVEL)
ClintTrip
I developed APIs for the iOS and Android platforms using PHP, Laravel, and MySQL. I also created dashboards for managing the system using open-source HTML templates. I utilized my skills in PHP, Laravel, and MySQL to create a seamless backend system.

Full Stack Web Developer (PHP-LARAVEL)
ApexMind (partTime)
I developed APIs for the iOS and Android platforms using PHP, Laravel, and MySQL. I also created dashboards for managing the system using open-source HTML templates. I utilized my skills in PHP, Laravel, and MySQL to create a seamless backend system.

Full Stack Web Developer (PHP-LARAVEL)
hossam-x-studios
I am constantly working on developing myself and my skills, and the place helped me do that by working on real projects, using laravel, livewire, filament, and dealing with a work team.

PROJECTS

MappingTool System (GitHub)
Developed a data management tool for handling references and related terms, with Excel import validation and dynamic data merging.
Technologies: Laravel, JavaScript, jQuery, Yajra Datatables.

Hulk Application (HulkApp)
Hulk makes home services effortless. Book cleaning, plumbing, electrical work, AC maintenance and more — all from trusted professionals ready anytime you need.
Technologies: Laravel, Blade, JavaScript, RESTful APIs, MySQL,fireBase (notification - tracking).

Ma3ak Application
Ma3ak is a ride-hailing platform similar to Uber that connects passengers with nearby drivers in real time. The application enables users to request instant rides, track drivers live on the map, and schedule trips in advance. It focuses on fast matching, accurate real-time tracking, and seamless trip management for both riders and drivers.
Technologies: Laravel, Blade, JavaScript, RESTful APIs, MySQL,firebase.

Smo Application(SmoApp)

Developed a real-time chat application with room-based communication, user interaction features, and in-app payment integration. Included an admin dashboard for managing users, rooms, and transactions. Designed for social connection and التعارف.
Technologies: Laravel, adminEncore, Blade, JavaScript, RESTful APIs, MySQL.

Student Attendance System (GitHub)
Built an attendance management platform with an admin dashboard, multi-role access, and mobile API integration for real-time tracking and online lecture access via coupon codes.
Technologies: Laravel, Blade, JavaScript, RESTful APIs, MySQL.

RateCV (RateCv)
Engineered the backend for an AI-powered CV rating platform, offering automated resume evaluations, career coaching, and job application tools.
Technologies: Laravel, Python, MySQL, Laravel Sanctum.

QuizApp (GitHub)
Developed a web application for educational purposes, allowing teachers to create and manage quizzes, and students to partici pate and receive instant grades. Featured role-based dashboards for teachers to view quizzes, manage student results, and edit questions. Technologies: Laravel, MySQL, HTML, CSS, JavaScript.

Tlaqi (Tlaqi)
Contributed to the development of a startup and investment matchmaking platform, enabling project submissions, investor disco very, and role-based user access.
Technologies: Laravel, MySQL, RESTful APIs, Laravel Sanctum.

EgyCam
Built APIs for a mobile app that connects users with camera operators for event marketing, along with a management dashboard for orders and system entities.
Technologies: Laravel, MySQL, HTML, CSS, JavaScript.

School management system (GitHub)
Developed a comprehensive school management platform with multi-role access for students, teachers, parents, and admins. Included features for exam creation, attendance tracking, and role-based dashboards.
Technologies: Laravel, MySQL, Livewire, Spatie Translatable, Mcamara.
